I. Legislative Requirement

This document has been compiled pursuant to language set forth in the Fiscal Year (FY) 2022 Department of Homeland Security (DHS) Appropriations Act (P.L. 117-103).

P.L. 117-103 states:

- SEC. 307. The reporting requirements in paragraphs (1) and (2) under the heading "Federal Emergency Management Agency—Disaster Relief Fund" in the Department of Homeland Security Appropriations Act, 2015 (Public Law 114–4) shall be applied in fiscal year 2022 with respect to budget year 2023 and current fiscal year 2022, respectively—
 - (1) in paragraph (1) by substituting "fiscal year 2023" for "fiscal year 2016"; and
 - (2) in paragraph (2) by inserting "business" after "fifth".

The FY 2015 DHS Appropriations Act (P.L. 114-4) (referenced in P.L. 117-103) states:

Provided, That the Administrator of the Federal Emergency Management Agency shall submit to the Committees on Appropriations of the Senate and the House of Representatives the following reports, including a specific description of the methodology and the source data used in developing such reports:

- (1) an estimate of the following amounts shall be submitted for the budget year at the time that the President's budget proposal for fiscal year 2016 is submitted pursuant to section 1105(a) of title 31, United States Code:
 - (A) the unobligated balance of funds to be carried over from the prior fiscal year to the budget year;
 - (B) the unobligated balance of funds to be carried over from the budget year to the budget year plus 1;
 - (C) the amount of obligations for non-catastrophic events for the budget year:
 - (D) the amount of obligations for the budget year for catastrophic events delineated by event and by State;
 - (E) the total amount that has been previously obligated or will be required for catastrophic events delineated by event and by State for all prior years, the current year, the budget year, the budget year plus 1, the budget year plus 2, and the budget year plus 3 and beyond;
 - (F) the amount of previously obligated funds that will be recovered for the budget year;
 - (G) the amount that will be required for obligations for emergencies, as described in section 102(1) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122(1)), major disasters, as described in section 102(2) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act 42 U.S.C. 5122(2)), fire management assistance grants, as described in section 420 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5187), surge activities, and disaster readiness and support activities; and

(H) the amount required for activities not covered under section 251(b)(2)(D)(iii) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(D)(iii); Public Law 9–177)...

II. Background

Reporting requirements for the Disaster Relief Fund (DRF) include:

- The amount required for obligations for emergencies, as defined in Section 102(1) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, or Stafford Act, (42 U.S.C. 5122 (1)); for major disasters, as defined in Section 102(2) of the Stafford Act (42 U.S.C. 5122 (2)); for fire management (FM) assistance grants (FMAG), as defined in Section 420 of the Stafford Act (42 U.S.C. 5187); for surge activities (SU); and for disaster readiness and support (DRS) activities;
- The amount required for obligations for catastrophic events;
- The amount required for obligations for noncatastrophic disasters;
- The unobligated balance of funds in the DRF that were carried over from the prior fiscal years;
- The unobligated balance of funds in the DRF for carryover in the next fiscal year;
- The amount of previously obligated funds recovered for the budget year; and
- The amount of funds previously obligated or required for catastrophic events, delineated by event and state for all prior years, the current year, the budget year plus one, the budget year plus two, and the budget year plus three.

III. Assumptions

Providing cost estimates for disaster-related events that, in some cases, have yet to occur is complex and imprecise, given various factors throughout the fiscal year that may alter the estimates—total amount, category of expense, and/or timing of obligations could change. To that end, several assumptions, listed below, are considered with respect to cost estimates presented.

- 1. Estimates assume that no new catastrophic events will occur during the budget year. The Federal Emergency Management Agency (FEMA) defines a catastrophic event as a disaster or a grouping of disasters (i.e., a disaster event) resulting in a total cost to the Federal Government in excess of \$500 million. As in prior years, the budget assumes that future catastrophic events during the budget year will be funded separately with emergency supplemental appropriations.
- 2. Estimates for catastrophic events that occurred are derived from bottom-up cost estimates obtained from FEMA staff working with state and local governments to support disaster relief. Given this approach and given that spending plans typically do not go beyond 1 fiscal year, estimates for FY 2023 and beyond are based primarily on available cost-estimate information. Further, the actual timing of obligations is subject to the required clearance and approval processes.
- 3. FEMA defines a noncatastrophic event as a major disaster declaration that costs the Federal Government less than \$500 million. Estimates for noncatastrophic disasters are based on a rolling 10-year average of prior-year noncatastrophic disaster obligations. The estimates assumes that noncatastrophic spending in the budget year holds to this average. The average is updated at the beginning of each fiscal year after final closeout of the accounting system.
- 4. The amount of funds expected to be recovered in a given year depends on several factors, including availability of resources to close out contracts and grants, active participation from other federal agencies in validating and closing out mission assignment balances, and obligation reviews and adjustments during the fiscal year that reduce future recovery of funds.
- 5. Estimates assume that no major policy or legislative changes will be enacted during the budget year that could affect projections significantly. Policy changes or new legislative mandates enacted without associated resource considerations could affect the estimates. For example, the impact to the DRF from new authorities granted within the Sandy Recovery Improvement Act of 2013 (part of the Disaster Relief Appropriations Act, 2013 (P.L 113-2)) resulted in additional obligations of more than \$1 billion in FY 2016 for Hurricane Katrina-capped public assistance grants. Other examples include presidentially authorized cost-share adjustments, expanded eligibility, Presidential Executive Orders, and costs related to the implementation of the Disaster Recovery Reform Act (P.L. 115-254).

IV. FY 2023 DRF Funding Requirements

Table 1 summarizes the estimated DRF funding requirements for FY 2023. In consideration of the assumptions listed in Section III of this report, a number of factors can cause significant variability in disaster spending in a given year.

An obvious issue with forecasting disaster activity and related costs stems from the inability to predict weather patterns, geologic events, incidents of terrorism, pandemics, and other DRF-related funding scenarios from one budget year to the next. A secondary issue arises when events occur and resources are diverted from existing recovery and mitigation efforts to address new, urgent, and immediate concerns. Thus, predictable spending patterns for ongoing recovery efforts may change as more urgent needs take precedence. Another overarching issue in predicting DRF budget needs stems from the variability (scope, impact, location, type of requirements, state and local capabilities, legislative and policy changes, etc.) inherent in disaster requirements. For example, projections included for past catastrophic events rely on estimates provided by regional FEMA staff working closely with states and localities based on assessment of the above factors.

As depicted in Table 1 below, a reserve of \$2 billion is included to ensure that FEMA maintains the ability to fund initial response operations for new significant events. A total of \$1 billion is set aside for PDM through the BRIC grant program to help communities implement resilience projects that reduce future risks from natural disasters, pursuant to Section 1234 of P.L. 115-254. Given sufficient carryover balances in the DRF Base, FEMA is not seeking additional funding in FY 2023.

Table 1. DRF FY 2023 Funding Requirements

1) This table does not include prior-year recoveries.

V. Specific Estimates

A. Funding for Major Disasters

In estimating funding for major disasters, FEMA considers projected FY 2023 obligations for previously declared catastrophic events (\$14.202 billion) and FY 2023 estimates for noncatastrophic major disaster activities (\$2.538 billion). As shown in Table 2 below, the total FY 2023 estimated requirement for major disasters is \$16.74 billion.

Table 2. FY 2023 Estimated Obligations for Major Disasters

Major Declarations	Estimated Funding Requirement (\$ in millions)					
Catastrophic	\$	1,711				
Noncatastrophic		2,538				
COVID-19		8,733				
Harvey, Irma, Maria		3,758				
Total	\$	16,740				

B. Catastrophic Events

The FY 2023 requirement of \$14.202 billion for previously declared catastrophic events is derived from a bottom-up budgeting process using spend plans prepared by regional FEMA staff working with affected states and localities.

Appendix A includes details on the FY 2023 estimated obligations for the following events: 2005 hurricane season (Hurricanes Katrina, Rita, and Wilma); Hurricanes Ike, Gustav, Irene, Isaac, Sandy, and Matthew; 2008 Midwest floods; 2010 Tennessee floods; 2011 Spring tornadoes and floods; 2013 Colorado flood; 2016 West Virginia floods, 2016 Louisiana floods; Tropical Storm Lee; 2017 California winter storms, 2017 California wildfires; 2017 hurricane season (Hurricanes Harvey, Irma, and Maria); Hurricane Florence; Hurricane Michael; Typhoon Yutu; 2018 California wildfires; 2019 Northeast Winter Storm, Coronavirus Disease 2019 (COVID-19) pandemic; 2020 Puerto Rico earthquake; Hurricane Laura, 2020 California and Oregon wildfires; and Hurricane Ida. These estimates were derived using the most current information available and assume that no new catastrophic events will occur during the budget year.

Detailed estimates presented in the appendix include total obligations through FY 2021, projected obligations for FY 2022 and FY 2023, and an estimate for obligations from FY 2024 through FY 2026.

C. Noncatastrophic Major Disaster Estimate

Projected FY 2023 obligations for noncatastrophic major disasters were determined by averaging the past 10 years' obligations. The average was computed with no outliers (i.e., no exclusion of high or low values) because all data fall safely within three standard deviations of the mean. As detailed in Table 3, the inflation-adjusted 10-year average is calculated to be \$2.538 billion.

Table 3. Historical Obligations - Noncatastrophic Major Disasters

Noncatastrophic Obligations (\$ in millions)							
Fiscal Year		<u>Total</u>					
2012	\$	2,369					
2013		1,711					
2014		1,904					
2015		2,393					
2016		3,677					
2017		1,927					
2018		2,398					
2019		2,212					
2020		3,520					
2021		3,269					
Grand Total		25,380					
10-Year Average	\$	2,538					

D. Base Funding Estimates

The DRF Base is used to fund emergency declarations (EM), FMAGs, predeclaration SUs, and programmatic readiness and preparedness activities authorized under the Stafford Act. The FY 2023 DRF Base requirement is \$725 million, which includes \$322 million for EMs, FMAGs, and SUs, \$10 million for the anticipated transfer to the U.S. Agency for International Development (USAID), and \$393 million for the DRS account. Table 4 provides a historical depiction of the Base category funding for EM, FMAG, and SU activities. Because funding for these activities is difficult to plan for, the 10-year average of \$322 million is the basis for the FY 2023 requirement.

Table 4. Historical Obligations - Base Activities (EM, FMAG, SU)

All Events (\$ in millions)								
Fiscal Year	EM		FMA(J	SU		Total	
2012	\$	303	\$	61	\$	41	\$	405
2013		62		128		25		215
2014		20		120		9		149
2015		2		146		14		162
2016		28		108		12		148
2017		107		66		175		348
2018		104		289		102		495
2019		138		209		111		458
2020		123		141		19		283
2021		196		237		124		557
Grand Total		1,083		1,505		632		3,220
10-Year Average	\$	108	\$	151	\$	63	\$	322

Conversely, the DRS category encompasses spending controlled through a more traditional annual budgeting process; therefore, the FY 2023 budget estimate for this category is derived from spending plans in lieu of the 10-year average. The average for the EM, FMAG, and SU activities, the anticipated transfer to USAID, plus the budget requirements for the DRS category, make up the total FY 2023 Base requirement of \$725 million as shown in Table 5. Given sufficient carryover balances in the DRF Base, FEMA is not seeking additional funding in FY 2023.

Table 5. Base Estimated Funding Requirements

Base Categories	Estimated Funding Require (\$\\$ in millions)	rement
EM	\$	108
FMAG		151
SU		63
DRS		393
Anticipated Transfer to USAID		10
Offset from Estimated Carryover Balance		(725)
Total	\$	-

DRS funding enables FEMA to be more proactive and to provide a robust readiness posture to respond to large-scale, complex, presidentially declared major disasters instead of waiting for disasters to occur and then reacting with costlier and less efficient response actions. This funding allows FEMA to provide timely disaster response, responsive customer service, and cost-effective program oversight and delivery. Cost variability in the DRS account is driven by the severity of annual disasters, which determines the level of workforce response activities. Typically, the more active the disaster season, the more these DRS costs shift to the Major Disasters portion of the DRF. Conversely, a less active disaster season results in greater obligations in the DRS, which is supported by the DRF Base. The FY 2023 DRS requirement of \$393 million is based on FEMA's detailed spending plans using a zero-based budget

methodology prepared by the FEMA program offices. The DRS funds key activities and initiatives, such as:

- Salaries and expenses for Stafford Act Employees (SAE) while not deployed to a specific disaster;
- Qualifications, training, and equipment for SAEs;
- Stockpiling and maintaining of pre-positioned disaster assets and commodities;
- Support contracts that enable FEMA to mobilize response and recovery capacities as quickly as needed;
- Disaster facilities and support costs; and
- Non-enterprisewide information technology (IT) systems that directly support disaster response and recovery activities.

FEMA continues to increase its transparency and budgetary disciplines within the DRS account using detailed annual spend plans and program reviews. DRS readiness categories (RC) provide added visibility in reporting cost projections and obligations. DRS RCs include: (1) cadre operational readiness and deployability structure; (2) readiness support contracts and supplies; (3) facilities support; and (4) IT support. FEMA measures operational readiness annually through Government Performance and Results Act reporting, which demonstrates preparedness across disaster employee staffing, training, and equipping metrics.

In addition, the RC structure enhances the justification of resources needed to support cadre operational readiness and response capabilities. This approach helps to measure FEMA's current state of readiness and identifies potential weaknesses and needs. As a result, FEMA is better informed on how to maintain its critical disaster support activities and infrastructure, ensuring the timely delivery of disaster assistance. Table 6 depicts the FY 2023 DRS funding requirement of \$393 million.

Table 6. DRS Readiness Category Reporting Structure

	Tuble of Diss reduiness category reporting structure

Leases and Support Cost	Rental or lease of space or structures and associated facility costs	86
Information Technology Support		78
IT Systems	Disaster IT, technical support, infrastructure costs, lifecycle system maintenance costs, cybersecurity, and any other operations & maintenance not specified	78
	TOTAL DRS	\$ 393

E. Prior-Year Carryover

A number of factors influence the actual DRF carryover balance. Key factors that may change the FY 2022 ending balance include actual FY 2022 obligations and recoveries, actual transfers, supplemental appropriations, and the 6 percent set-aside amount for PDM, per P.L. 115-254. As of the month ending January 31, 2022, FEMA estimated that the DRF will end FY 2022 with a balance of \$11.885 billion, projecting \$8.443 billion in the DRF Majors and \$3.442 billion in the Base. This estimate is a point-in-time estimate that is expected to change before the end of FY 2022.

F. Future-Year Carryover

Projected carryover into FY 2024 is dependent on the FY 2023 carryover, FY 2023 appropriations, and FY 2023 obligations.

G. Recoveries

Recoveries totaled \$8.156 billion in FY 2021 and are expected to exceed \$3.3 billion by the end of FY 2022.
